Chennai, Tamil Nadu, India

SUMMARY

Quality Analyst with 6+ years of experience in SaaS and marketplace applications. Expertise in manual and automation testing, test strategy design, API testing, and performance testing. Skilled in Playwright, Postman, and JMeter, with hands-on experience integrating automation into CI/CD pipelines. Experienced in leveraging Generative AI tools such as Claude and ChatGPT to accelerate automation script development and improve testing efficiency. Strong background in Agile environments, collaborating with cross-functional teams to deliver scalable, high-quality software solutions.

PROFESSIONAL EXPERIENCE

Quality Analyst - Spritle Software | *Mar 2022 – Present*

Automation Testing (Playwright - JavaScript)

- Designed and developed reusable automation frameworks using Playwright
- Automated functional and integration test scenarios for marketplace platforms (Shopify, BigCommerce, OpenCart, PrestaShop)
- Integrated automated test suites into CI/CD pipelines for continuous testing
- Improved regression efficiency and reduced manual testing effort through automation
- Used Generative AI tools such as Claude and ChatGPT alongside coworker collaboration to accelerate automation script development, speeding up implementation of test scripts

API Testing (Postman)

- Validated REST APIs for SaaS platforms including Freshworks, Zendesk, Zoho, and Monday.com
- Developed Postman collections and automated test suites for regression and integration testing
- Verified response codes, payloads, and error handling for end-to-end data validation

Performance Testing (JMeter)

- Designed and executed load, stress, spike, and endurance tests for CPaaS messaging APIs
- Analyzed non-functional requirements (NFRs) and created workload models
- Identified performance bottlenecks and collaborated with dev/infra teams for optimization
- Generated detailed performance reports with actionable insights

Manual & Functional Testing

- Analyzed user stories, business requirements, and acceptance criteria
- Designed and executed test cases for functional, regression, and integration testing
- Performed database validation using SQL queries
- Logged, tracked, and verified defects using Jira
- Collaborated with developers and business analysts for issue resolution
- Supported UAT and ensured quality during production releases

Key Achievements:

- Reduced regression testing time through automation implementation
- Improved defect detection before production releases
- Executed extensive test coverage across multiple SaaS and marketplace projects
- Accelerated automation script development by integrating Gen AI tools (Claude, ChatGPT) into the scripting workflow

---

Test Engineer Trainee - Interlace India | *Oct 2020 – Mar 2022*

- Performed functional and integration testing for enterprise and government applications
- Designed test cases for workflows including approvals, onboarding, and employee modules
- Validated backend logic and end-to-end user journeys

- Worked under CMMI Level 5 processes ensuring quality standards

---

Testing Trainee - Indium Software | *Jan 2020 – Jun 2020*

- Gained hands-on experience in test case design, execution, and reporting
- Learned software testing fundamentals and QA best practices

SKILLS & TOOLS

- Automation: Playwright (JavaScript), Selenium (Basic)
- API Testing: Postman
- Performance Testing: JMeter
- Gen AI Tools: Claude, ChatGPT — used to accelerate automation script writing and testing workflows
- CI/CD: GitHub Actions / Jenkins
- Defect Tracking: Jira
- Version Control: Git
- Database: SQL

TESTING EXPERTISE

- Functional Testing
- Regression Testing
- Integration Testing
- API Testing
- UI Testing
- Performance Testing
- UAT Support

PRODUCT KNOWLEDGE

- CRM
- SaaS
- CPaaS
- iPaaS
- Web Applications
- Laboratory Products
- ERP Software

EDUCATION

Bachelor of Engineering (Mechanical Engineering)
St. Peter's College of Engineering and Technology
Percentage: 6.57%

CERTIFICATIONS

- Manual Testing & SQL – QSpiders
- Udemy Certifications: Playwright JS, JMeter, Postman, GitHub, Selenium
- Claude Code in Action
- Certificate of Completion: Claude 101
- Certificate of Completion: AI Fluency Framework & Foundations

ADDITIONAL RESPONSIBILITIES (LEADERSHIP & OWNERSHIP)

- Conducted research and feasibility analysis for new integrations, tools, and features
- Handled customer communications to understand requirements and clarify use cases
- Translated business use cases into test scenarios and validation strategies
- Managed delivery coordination to ensure timely and quality releases
- Acted as a bridge between customers, developers, and internal teams for smooth execution
